

## **GRIN**

**Garden. Recharge. Inspire. Nourish.**

Run by a group of volunteers, this community garden at Arbory School has been growing strong for over seven years! Initially set up for parents and carers to learn gardening skills while their pre-school children played, there are now regular sessions through spring and summer for pupils too.

# Projects to inspire you

## **Garey Yn Ellan Ain**

Our Island Garden can be found on Station Road in St Johns, opposite St Johns School. The garden was commissioned by the Isle of Man Government in 2018 as part of the celebrations marking the designation of the Isle of Man as a UNESCO Biosphere.

A community group has been set up to stimulate local involvement in the garden and raise awareness and funds to allow it to be retained and continue to provide a sanctuary for people and wildlife going forward.

### **St Thomas's Church**

A wonderful project showing tiny spaces in busy places can pack a big punch!

This area outside St Thomas's church in Douglas was supported by Douglas City Council and Manx Wildlife Trust's Dragonflies Den project. It now hosts pots and planters enjoyed by the green fingered Rainbow's group, and passers by.

### **Thie Ny Shee**

A fabulous vision for wildlife and wellbeing, with plans for a small orchard and an outdoor area to benefit young people and nature, supported by Manx Wildlife Trust's Community Ranger, Hannah.
